

**Lotus® Pro: the cleaning concept that allows all daily replaces detergents. Innovative, durable and easy to use!**

The Lotus® Pro cleaning concept converts cold tap water into stabilized ozone water, the most powerful natural cleaning agent. Stabilized ozone water is a very effective cleaning method to eliminate dirt, stains and other germs. In this way, daily detergents can be replaced by a fully durable cleaning product. reinigingsmiddelen worden vervangen door een volledig duurzaam schoonmaakproduct.

**Stabilization module**

The stabilization module is connected to the cold tap water. Inside the stabilization module all lime and minerals are filtered out of the water. The stabilized water is then sent to the High Capacity Unit.

**High Capacity Unit**

The High Capacity Unit filters the oxygen out of the air and sets it by means of electricity into ozone. This ozone is added to the stabilized water, in this way the stabilized ozone water is produced. This combination creates a very effective, safe and durable cleaning product that can replace all daily glass, interior, sanitary and floor cleaners.

The Lotus® Pro cleaning concept scores 0- 0- 0-A on the MSDS (Material Safety Data Sheet), which means that it is safe for human use in any form. In short; no allergies, irritations or other reactions when one comes into contact with the product or even swallows it.

**Ozone water**

The stabilized ozone water has a purifying effect of 24 hours, after which it returns to its original state: oxygen and water. The product is safe during and after use.

**Scope of application**

Lotus® Pro can be applied to:

- All hard and water-resistant floor finishes such as vinyl, PVC and linoleum, floor covering, concrete, terrace and bricks.
- Bathroom and kitchen: glass, mirrors, stainless steel, chrome, shower, bathtubs, toilets and sinks.
- Interior such as stairs, railings, elevators, desks, tables and chairs.
- Laboratory equipment, appliances, machines and fruit and vegetables.

# A clean and healthy environment

## Discover all the benefits in terms of sustainability

### People

- Drastically reducing stockpiling of chemicals
- All-in-one solution increases efficiency
- Savings compared to traditional detergents
- Reduction of complaints as a result of working with chemical products
- Reduced maintenance costs of the cleaning equipment
- Application of a sustainability policy

### Profit

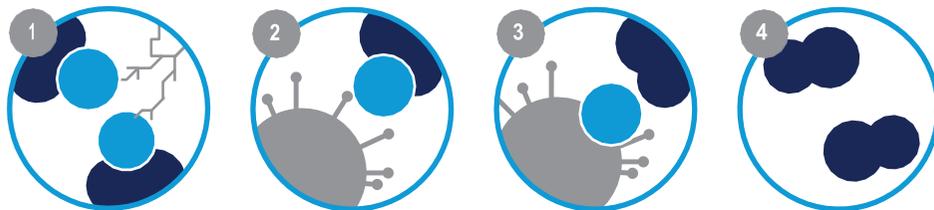

- No respiratory irritation or other allergic reactions
- Better for health and safety (MSDS-0-0-0-A)
- Reduction of slips and falls
- No exposure to chemicals for both employees and visitors
- Promotes a healthier working environment

### Planet

- Reducing your carbon footprint
- Recyclable
- Harmless to nature when the product is washed away
- Green Seal certified: GS-37 and GS-53 label
- Complies with LEED and BOMA BEST

## Lotus® Pro in 4 simple steps

Oxygen is converted into ozone, which is added to the water.

Ozone is attracted to germs, bacteria and stains.

Ozone attacks and eliminates contaminants.

After 24 hours only oxygen and water remain.
